※プレートとガードを一旦分離し、先にガードではさんでからプレートをかぶせると取り付け易いです。

The diagram illustrates the assembly of the guard and plate. It shows a base plate (3) with a central hole and a guard (9) with a central hole. The guard is placed over the base plate, and the plate is then secured with screws. The text indicates that it is easier to attach the plate after separating the guard and plate, and placing the guard over the plate first.
